

2019 SEIA VIC CONFERENCE TULLAMARINE Feb 20 - 21

About SEIA VIC

We believe that Solar has an important part to play in the future of our society.

Our industry should be trusted and respected.

The people who act on behalf of our industry (the Installers) also need that respect and therefore need a voice of their own.

A Conference that is specifically created for you the Solar Installer.

About our yearly Conference.

The Solar Energy Installers Association of Victoria Conference brings together a mixture of older experienced Installers who have the practical knowledge of years of experience and younger innovative Installers that are all over new technology. The experience at this conference can't be found anywhere. It is this great knowledge mix that keeps our conference attendees coming back year after year!

Why go to the SEIA VIC Conference?

- 120 CPD Points have been allocated for the full conference
- Gain a better knowledge of what industry trends and changes are affecting the Solar Installer
- Gain valuable insights from industry leaders from government and electrical companies
- Meet with manufacturers and find out what's new and what products you can be using in your Solar business
- Network with industry peers
